

*It's no longer a question of **should** you do business with China—  
The only question is **who** you should do business with.*

Let us help you! **Great Central Turf (GCT)** specializes in providing high quality components and products to many different industries. **GCT's** goal is to maintain stock in our US warehouse and ship on demand so that our customers can benefit from international cost savings without hassles of large order quantities, long lead times, and international shipping procedures.

### Procurement

- Locating the best manufacturer for each product
- Verifying each manufacturers financial status
- Validating the manufacturers quality control systems
- Providing PPAP and Production approval samples
- Negotiating the lowest price for each GCT customer
- Translating any and all applicable documents
- On site monitoring

### Shipping

- Managing international sea shipments to reduce transport costs
- Combining different customers shipments to take advantage of larger volume sea shipments
- Assuring FIFO inventory flow at all points
- Coordinate timing of sea and truck shipments
- Negotiate and pay all duties and customs fees

### Domestic Warehousing

- Maintain inventory in our domestic warehouse

**At our expense — not yours!**

- Ship to you on a flexible release schedule

**A your request**

- Maintaining safety stock both domestically and at the manufacturer.

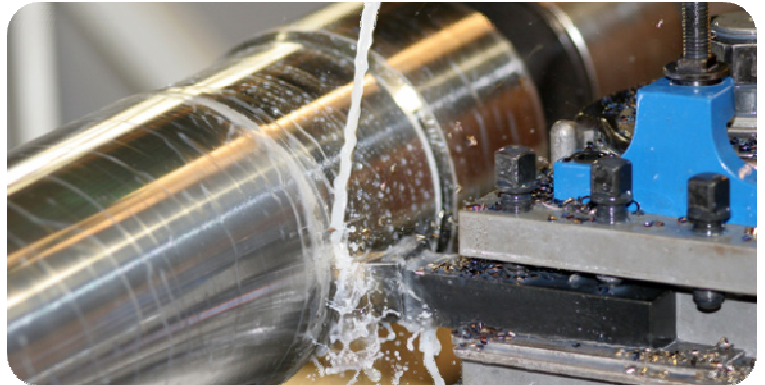

GCT has extensive knowledge of the Chinese market, its manufacturing capabilities and quality practices. We are able to provide the high quality your customers demand at prices which will keep you competitive.

**Ultimately**— we want our customers to feel they are doing business with a responsive domestic company while enjoying the advantages of the lower costs provided by foreign manufacturers.

## Machining

*Whether your requirements call for steel, aluminum, stainless steel, or exotic metals, we can manufacture the close-tolerance, intricate or simple parts that you need. Boring, turning, slotting, drilling, and tapping are operations that we perform routinely. From small pieces to large, from proto-type to short run and big-lot production we can produce machined part to your exacting specifications.*

- General Machining
- CNC Machining
- Milling and Turning
- Screw Machining
- 5 Axis Machining
- Machining of Castings
- Swiss Machining
- Milling, Grinding, Turning, Drilling

- Low Carbon and High Carbon Steel
- Stainless Steel
- Aluminum
- Cast Gray, and Ductile Irons

## Castings

*You can rely on GCT to take your cast parts from paper to finished component - tooled, cast, machined, tested and delivered. We carefully select the suppliers for all of the materials used in the casting process as well as the materials used to make your parts. Whether this is high grade aluminum, steels or irons you can be assured you are getting the best parts possible.*

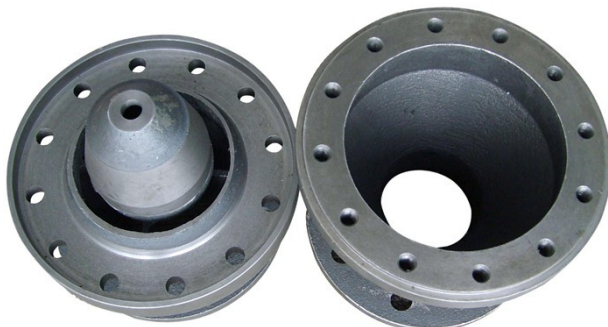

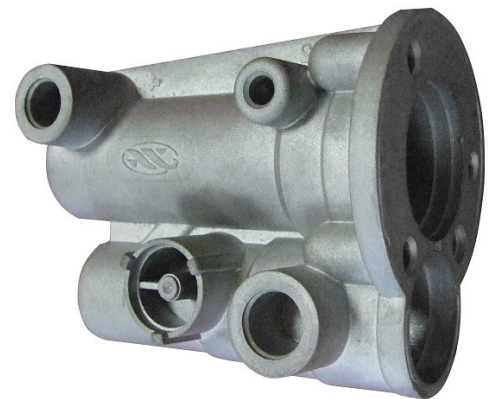

### **Low Cost Tooling (often no charge!)**

- Sand Castings
- Permanent Mold Casting
- Investment Castings
- Die Castings
- Centrifugal casting

### **Secondary Operations**

#### **— Machining and Finishing!**

- Gray and Ductile Iron
- Steel and Stainless Steel
- Aluminum and Zinc

## Stampings

*From low volume to mass production, GCT can be your single source for high quality, cost effective stamped products for a wide range of applications and industries. We use a combination of state-of-the-art metal stamping equipment and experienced personnel to ensure your part is produced accurately and efficiently – every time!*

### **Low Cost Tooling (often no charge!)**

- Blanking and Trimming
- Draw and Deep Draw
- Coin and Forming
- Extrusions

- Progressive Dies
- Line and Transfer Dies
- Riveting, Welding, Assembly and finishing!

## Forgings

*Nothing beats forgings for strength and reliability. At GCT we are forging specialists, with the equipment and craftsmen to produce the highest quality forgings. Complemented by our machining abilities we can provide any forging complete – machined, finished and shipped to you when you need it.*

### **No charge for tooling!**

- Open Die Forging
- Impression Forging
- Cold Forging
- Near Net Shape Forging

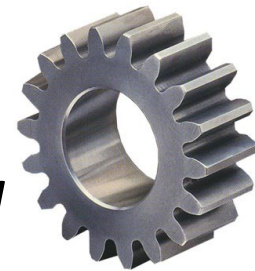

***....and more!***

*At GCT we believe we can find a source for any of your parts.  
With our numerous contacts and close working relationship  
with our manufacturers no challenge is too great!*
